TLU	Tropical Livestock Unit			
TWENDE	Towards Ending Drought Emergencies in Kenya			
VMDC	Veterinary	Medicines	Directorate	Council

Vote No. 1162

Vote Title: State Department for Livestock Development

Part A: Vision

A leading public agency in creating a sustainable and globally competitive livestock sector.

Part B: Mission

To promote sustainable development of the livestock sector by creating an enabling environment through policy and legislative interventions while providing services that increase productivity, value addition, market access and income in the livestock industry.

Part C: Performance Overview and Rationale for Funding

The State Department for Livestock Development (SDLD) derives its mandate from the Executive Order No. 1 of 2023 (amended by Executive Order No.1 of 2025). The mandate is to promote, regulate and facilitate the livestock industry for socio-economic development. The core functions of the Department are: livestock policy management; development of livestock industry; veterinary services and disease control policy; range development and management; livestock marketing; promotion of dairy industry; livestock insurance policy; livestock branding; promotion of bee keeping and apiculture; promotion of quality of hides and skins; livestock research and development; animal genetic research; and Tsetse fly and Trypanosomiasis research and control. It oversees the running of seven (7) Semi-Autonomous Government Agencies (SAGAs) under its purview.

During the Financial Years (FY) 2023/24-2025/26, SDLD implemented the Livestock Resources Management and Development Programme with focus on 5 sub-programmes namely: Livestock Policy Development and Capacity Building; Livestock Production and Management; Livestock Products Value Addition and Marketing; Food Safety and Animal Products Development; and Livestock Diseases Management and Control.

The approved budget allocation was: KShs. 11,628.57 million, KShs. 11,007.48 million and KShs.13,626.12 million for FY 2023/24, FY 2024/25 and FY 2025/26 respectively. The actual expenditures were KShs 10,682.18 million, KShs. 10,647.38 million and KShs 12,641.47 for FY 2023/24, FY 2024/25 and FY 2025/26 respectively. This translated to absorption rates of 92%, 97% and 93% in the respective years.

During the review period, the State Department for Livestock Development strengthened sector governance through the review and development of nine Bills and the development, launch and dissemination of six (6) policies, including the Leather Development Policy and the Agriculture Insurance Policy. In addition, the Department initiated the development of the National

Livestock Master Plan to provide a long-term framework for investment, planning and sustainable growth of the livestock sector.

Performance improved across the five sub-programmes. Under Livestock Policy Development and Capacity Building, institutional and human resource capacity was strengthened through the graduation of 3,469 students from livestock training institutions, engagement of 3,249 animal health interns, and training of 3,835 dairy, beef and apiculture value chain actors together with 2,197 leather value chain actors. Regulatory oversight was enhanced through strengthened veterinary medicines regulation, inspection of veterinary practices and improved compliance within the veterinary profession, while ICT modernization and institutional reforms continued to improve service delivery.

Under Livestock Production and Management, the Department expanded livestock breeding and genetic improvement programmes through the production of 2.227 million bull semen straws, 85,776 goat semen straws, and advancement of the Embryo Transfer Laboratory to 76 percent completion. Dairy value chains were strengthened through procurement of 230 milk coolers with a combined capacity of 475,000 litres per day benefiting dairy farmer groups in 40 counties. The Department also produced and distributed 3,307 bee colonies to beekeepers, while construction of three model feedlots at Chemogoch (Baringo), Kiburu (Meru) and Hadado (Wajir) reached 95 percent, 95 percent and 90 percent completion, respectively. To enhance climate resilience and livelihoods in arid and semi-arid areas, 51,660 sheep and goats were distributed to 10,332 vulnerable households across 16 ASAL counties under the livestock restocking programme.

Under Livestock Products Value Addition and Marketing, significant progress was achieved in strengthening dairy, leather and livestock marketing value chains. Construction of the Common Effluent Treatment Plant and Industrial Warehouses at the Leather Industrial Park reached 95 percent and 97 percent completion, respectively, laying the foundation for increased leather processing capacity, value addition and enhanced market competitiveness. Investments in dairy infrastructure, market systems and producer organizations further promoted commercialization and improved market access for livestock products.

The Food Safety and Animal Products Development sub-programme strengthened food safety and quality assurance through inspection of 16,901 milk handling premises and an average of 79,591 milk quality and safety tests conducted annually to ensure compliance with national standards. In addition, 657 samples of foods of animal origin were analysed for safety and quality, while 12 animal feed plants were inspected to strengthen regulatory compliance and safeguard public health.

Under Livestock Disease Management and Control, the Department enhanced national animal health systems through the production of 97 million doses of assorted livestock vaccines, strengthening disease prevention and control programmes across the country. Laboratory diagnostic capacity was enhanced through analysis of 178,300 animal disease samples, supporting improved disease surveillance, early detection and monitoring of antimicrobial resistance. Continued investments in veterinary laboratories, regulatory inspections and

surveillance systems strengthened preparedness against transboundary animal diseases and contributed to improved livestock health and safe trade.

Despite these achievements, programme implementation continued to face several constraints, including inadequate budgetary allocations, delayed Exchequer releases, ageing infrastructure, inadequate human resource capacity, procurement delays, limited ICT infrastructure, and insufficient laboratory facilities. The increasing effects of climate change continued to reduce livestock productivity, degrade rangelands and increase the incidence of livestock diseases and pests. Weak coordination between the National and County Governments in data management and service delivery also affected programme implementation.

To address these challenges, the Department accelerated the digitization of livestock service delivery, undertook staff training and recruitment to address inadequate human resource capacity, strengthened governance and oversight through the Budget Implementation Committee (BIC), Departmental Project Committee and Contract Implementation Teams (CITs), enhanced monitoring and evaluation systems, continuous financial resource mobilization through exchequer and development partners to support refurbishment and upgrading of infrastructure and facilities and promoted stronger collaboration with County Governments, development partners and the private sector. These interventions improved accountability, resource utilization and implementation efficiency.

During the 2027/28–2029/30 Medium-Term Expenditure Framework (MTEF) period, the State Department will implement the Livestock Resources Management and Development Programme through five sub-programmes aimed at advancing the agricultural pillar of the Bottom-Up Economic Transformation Agenda (BETA) and delivering the priorities of the Fourth Medium Term Plan (MTP IV). The interventions will focus on increasing livestock production and productivity, strengthening livestock value chains, enhancing food safety and animal health systems, promoting value addition, commercialization and marketing, creating employment opportunities, and improving the policy and institutional environment for sustainable sector growth.

The Department will strengthen the policy, legal and institutional framework through the review and development of six policies, eight Bills, twelve Regulations and twelve strategies. Institutional capacity will be enhanced through modernization of ICT infrastructure in training institutions, livestock farms and stations; capacity building for 1,300 staff; graduation of 3,750 students from livestock training institutions; completion of the Livestock Training Institutes at Mogotio and Awendo; engagement of 4,450 animal health interns; and training of 7,949 livestock value chain actors. Regulatory oversight will also be strengthened through licensing of 6,000 veterinary practices, 9,600 animal health service providers, registration of 5,350 animal health practitioners, and establishment of six regional offices of the Kenya Veterinary Board.

To improve livestock production and productivity, the Department will produce 3.3 million bull semen straws, 210,000 goat semen straws, complete the Embryo Transfer Laboratory, analyze 24,900 milk samples for breed improvement, produce and distribute improved breeding stock

comprising sheep, goats, pigs, rabbits and bee colonies, distribute 240,000 chicks to MSMEs, maintain an average of 8,000 breeding animals in Government farms, complete three model feedlots, finish 4,000 cattle for market, and produce 1.65 million pasture bales. Climate resilience interventions will include insuring 459,066 Tropical Livestock Units (TLUs), supporting 147,735 pastoralists through financial inclusion initiatives, linking 800 pastoral groups to markets, providing KSh 1.514 billion in livestock insurance premium subsidies, reseeding 1,700 acres of rangelands and establishing 145,000 indigenous tree seedlings in degraded landscapes.

To strengthen livestock products, value addition and marketing, the Department will establish a leather laboratory and administration block, train 7,250 hides and skins value chain actors, provide 16,046 subsidized flaying knives and dehiders, facilitate access to production inputs and technologies for 2,500 rural producers, and improve market, processing and storage access for 583 households.

Food safety interventions will focus on inspecting 12,320 milk handling premises, testing 306,375 milk samples, licensing 13 milk plants, 19 export slaughterhouses, 14 animal feed plants and four honey processing facilities, and testing 4,500 samples of foods of animal origin for residues to safeguard public health and facilitate domestic and international trade.

In livestock disease management and control, the Department will produce and distribute 150 million doses of assorted livestock vaccines, analyse 204,000 animal disease samples, maintain 2,000 animals for efficacy trials, vaccinate 52 million sheep and goats annually against Peste des Petits Ruminants (PPR), vaccinate 22.7 million cattle annually against Foot and Mouth Disease (FMD), operationalize and equip 16 Border Inspection Points, and suppress tsetse fly populations across eight tsetse belts to reduce the incidence of African Animal Trypanosomiasis and strengthen livestock health and trade.

Part D: Strategic Objectives

The sub-sector has only one programme as indicated below.

Programme	Strategic objective
Livestock Resources Management and Development	To promote, regulate and facilitate the livestock sector for sustainable socio-economic development and accelerated industrialization.

Part E: Summary of the Programme Key Outputs, Performance Indicators and Targets for 2027/28 -2029/30

This section gives a summary of Programme Key outputs, Performance indicators and Targets for the FY 2027/28 and the medium-term period.

Programme	Delivery Unit	Key Outputs	Key Performance Indicators	Target 2025/26	Actual Achievement 2025/26	Target (Baseline) 2026/27	Target 2027/28	Target 2028/29	Target 2029/30
Programme: Livestock Resource Management and Development									
Outcome: Promote, regulate and facilitate livestock sector for social economic development and industrialization
